AMENDMENT

Sir:

In response to the Office Action dated June 18, 2001, please amend the above-identified application in the following manner:

IN THE CLAIMS:

Sub B1  
1. (Amended) A method for generating a graphical image on a display from data describing at least one object, the display including a plurality of positions, each of the plurality of positions having an area, the method comprising the sequential steps of:

Al  
(a) determining if a portion of an object of the at least one object intersects a current position of the plurality of positions and providing an output if the portion intersects the current position;

(b) providing a mask for the portion if it is determined that the portion intersects the current position, the mask indicating an extent to which the one portion occupies the area of the current position;
